

Metal Detectors

Made in America. *Family-Owned.* Since 1950.

In 1950, during the height of the search for uranium, Kenneth G. White built his first geiger counter in the basement of his furniture store in Sweet Home, Oregon. Soon, word spread about Ken's new invention and he was building them for customers far and wide. As the demand for uranium quieted, Ken turned his focus to metal detectors for finding gold and treasure. His first detector was a great success and marked the beginning of the metal detector industry.

Today, the tradition of quality, hand-built metal detectors is still going strong under the leadership of President Kenneth R. White. Still hand built on the banks of the Santiam River in Sweet Home, Oregon, White's continues to provide easy-to-use, deep-detecting metal detectors - for the hobbyist and the professional alike. The philosophy that guided Ken White's vision over sixty years ago remains the hallmark of the White's success story, "Give the customer quality and value and treat your employees like family."

UNDERSTANDING THE ICONS IN THIS CATALOG

COINS

Finds coins of all sizes, denominations and metal contents including old silver coins, modern silver clad, copper and zinc pennies and gold coins.

JEWELRY

Detects gold and silver rings, costume jewelry, pendants and medium to large chains and bracelets.

GOLD PROSPECTING

Special programs, features and/or operating frequencies for the challenge of finding gold nuggets, small to large.

RELICS

Finds relics of the past: Civil War collectibles, Revolutionary and other war artifacts, plus farm items.

BEACH MODE

Features and circuitry for hunting saltwater beaches; tunes out highly mineralized black sand to detect coins and jewelry.

CACHE

Detects large, deeply buried items, caches of coins and treasure chests.

METAL DETECTING is a fun activity to enjoy as an adventure, hobby, or way to relax. Once armed with your detector of choice, just step outside!

There's Treasure Everywhere...

The biggest misconception among new detectorists is thinking they have to go somewhere exotic to start hunting for treasures. You'll be amazed at what you might find right outside your front door. Wherever people have been, items have been lost and now are just waiting to be discovered. Your own turf will let you get to know your detector and its settings, maybe even finding something along the way. When you're comfortable, it's time to step out into the neighborhood. You might be surprised what you discover, even in urban and residential areas.

Find Friendly Experts...

You can benefit from others' wisdom in any area of life and metal detecting is no different. Finding a local treasure hunting club is a great way to learn from seasoned local pros. Even better than advice is the company of those who also enjoy the hunt and thrill of discovery. Just like with fishing, these folks will know some good spots, tell a few tall tales and make the journey more fun.

A Hobby That Fits Your Lifestyle...

You might find yourself seeking farther places to hunt, or packing your detector for vacations, but this hobby also fits into your regular life. Nearby beaches are given a new bounty by each passing storm and grassy strips next to sidewalks prove surprisingly rich in lost artifacts. You'll find excitement while metal detecting and the adventures fit easily around your life and location.

SIMPLY TURN ON THE V3i...

and start finding treasure! V3i is unequalled at finding those older, deeper, more valuable items, especially in areas hunted time after time with other metal detectors.

Spectra® V3i

THE SPECTRA® V3I IS WHITE'S FLAGSHIP METAL DETECTOR. The beautiful, full-color HD display clearly explains the depth and metal type of detected objects. If you're just starting out, the V3i has 10 presets, giving you turn-on-and-go versatility that fits your terrain and target... whether it's coins, jewelry, relics of the past, or gold nuggets. Expert users will appreciate the V3i's dozens of optional settings. You'll experience unparalleled depth and sensitivity, even in previously-hunted areas!

The V3i works best with the optional wireless SpectraSound headphones. White's premier headset lets you hear every signal with astonishing clarity and without worrying about outside noise or tangled cords.

Spectra® V3i

TRUE TURN-ON-AND-GO...

high performance metal detection. Rely on settings from the experts at White's for all the essential adjustments. Perfect for the detectorist who just wants to get out using the detector! And versatile enough to hunt for coins, relics, rings and jewelry... even gold.

Spectra® VX³

THE VX3 COMBINES THE PREMIER PERFORMANCE of the Spectra® V3i with the turn-on-and-go simplicity of the Coinmaster detector. This top-of-the-line metal detector is easy to use with 8 preset hunting programs. You'll be ready to discover coins, jewelry, gold, silver and relics. You can even take it to the shore with a specialized beach mode.

3 detecting frequencies are optimized for different targets: 2.5 kHz, 7.5 kHz and 22.5 kHz. When you come across a target, the SpectraGraph® Target Signature shows on the VX3's high-resolution display, helping you decide whether to dig. There are essential settings for you to optionally adjust, but the Spectra® VX3 is all about making treasure finding easy and detecting targets with performance worthy of the Spectra® name.

IN AND OUT OF THE WATER

*MX Sport does it all, finds it all. This is “no limits” detecting!
Ready for coinshooting, relic hunting and prospecting for
gold, the MX Sport is your all-terrain metal detector.*

MX Sport

THIS WATERPROOF METAL DETECTOR can do it all! Beach hunting, relics, coins and jewelry, even prospecting. With its roots in the MX lineup, MX Sport builds on the legendary MXT, including the latest technology for improved performance, more options, and expanded features. Selectable Tone ID, Audio Modulation, and Rejection Volume help hardcore hunters determine the difference between good and bad targets faster. Choose between track, track-lock, or salt-tracking ground balance. Dial in your SAT to deal with harsh ground minerals. The best part - the MX Sport is IP68 Certified Waterproof (up to 10 feet).

"Awesome machine. MX Sport finds deep targets with ease. White's, you hit it out of the park. Good job."

THE MYSTIQUE OF MXT

is surpassed only by the sheer volume of treasure found by it's users. The All-Pro has the versatility to hunt for all kinds of treasure, with the power to excel in prospecting and relic hunting's harsh grounds.

MXT All Pro

THE MXT ALL-PRO is like having three metal detectors in one! You'll enjoy the keypad, high-efficiency backlight, Grab and lock settings. This favorite comes with a 10" DD search coil. Three separate programs give you versatility with different target responses, display info and audio frequencies for relics, prospecting and coins/jewelry.

"Best detector ever. Amazing! I've only had the All Pro for 3 weeks and I have found 4 silver dollars and \$20 in change. It's a keeper!"

FEATURES

3 Audio Modes:

Beep And Vibrate | Beep Only | Vibrate Only

Adjustable Sensitivity 4 sensitivity settings

Waterproof to 10 feet, IP68 certified

LED Light a bright LED provides illumination while probing and acts as a power indicator

Ground Balance a quick press of the button "grabs" the ground for accurate ground balance

Target Ratcheting a quick press of the button ratchets in on strong target signals

Overload Indicator a large target will create a series of long audio/vibrate responses to signal overload

12 kHz operating frequency won't interfere with the frequency of your metal detector

Lost Pinpointer Alarm after 5 minutes of inactivity it sounds a long beep every 15 seconds, helping to locate it

Automatic Power Down after 5 minutes of the lost pinpointer alarm, it will power down to save batteries

Holster handy belt holster with lanyard loop

Replacement Shell designed so if the shell becomes worn down, it can be easily replaced

Low Battery Alert 3 cycles of double tone indicates low battery, with continuous blinking led

Ruler a handy ruler is embossed on the case to help determine target depth

Dual Battery System runs on included 2-AA's or a single 9-v. Adapter included

Battery Life: 20 hours

GMT® IS LEGENDARY...

in its pursuit of gold. Used by weekend prospectors and professional miners, it's rich with the features and performance needed in gold country. Sure it's designed especially for gold, but finds coins and relics as well.

Goldmaster® GMT

THE GMT IS WHITE'S GOLDMASTER® - used in goldfields around the world! This detector ignores the harsh ground found in gold-bearing areas to simplify prospecting and find nuggets large and small - plus coins & relics.

The GMT® is made for gold country, with 48 kHz operating frequency - the best for gold - and a waterproof search coil that's ready for streams and rivers. High-end features like the iron target analyzer make hunting easier. Manual controls are available for advanced users and each option includes a recommended initial setting.

Also onboard: variable self-adjusting threshold, Grab Pushpad for setting ground balance instantly, automatic ground balance and "Follow the Paystreak" feature, which displays the amount of magnetic minerals in the ground.

Goldmaster® GMT

\$799.95

SERIOUS PULSE POWER

The TDI PulseScan SL provides serious detectorists with affordable pulse power. Initially developed to meet the demands of gold prospectors searching for extremely small and deep nuggets, the TDI has evolved into a detector that has proven itself as an effective detector for relic hunting, beach hunting and, under the right conditions, even coin hunting.

TDI SL

THE TDI SL METAL DETECTOR has pulse induction power that provides unbeatable depth and sensitivity and is designed specifically for prospecting and identifying relics. Pulse detection is unequalled in handling iron-rich soil and hot rocks found in gold-bearing areas. Special prospecting features make life easier, such as full-control ground balance that filters out the iron mineralization of hot rocks, black sand and other tough grounds.

To hunt all day, you need a lightweight detector that still provides high performance. This compact detector weighs only 3.5 Pounds with its waterproof 12" spider search coil, which offers deep detection depth. Other accessory coils are also available.

The rechargeable NIMH battery lasts up to 6 hours and a backup AA battery back will power all-day exploration.

ACCESSORIES

make your treasure hunting more enjoyable and successful

<<< SPECTRASOUND WIRELESS HEADPHONE

No-delay real-time audio that matches perfectly with your Spectra V3i sweep speed and speaker response. Multiple channels to choose from to avoid picking up signals from other Spectra V3i/VX³s in the area, or set two headphones up to hear targets from one detector. A terrific tool for teaching about target sounds!
802-5282 **\$299.95**

PROSTAR HEADPHONE

A premium headphone "Made in the USA" by White's specifically for our metal detectors. Rugged, oversized earcups. Water-resistant chassis. 50 OHM Mylar Speakers with Titanium Coating. 5k Audio Taper with R/L ratcheting volume controls. Soft, coiled cord stretches to over 6 feet. Works with mixed-mode audio. 802-5323 **\$119.95**

<<< ULTRALITE HEADPHONE

UltraLite Headphones are packed with features to help you hear those smaller, deeper targets while being light, comfortable and collapsible. 1/4" headphone jack, coiled cord extender, foldable design for go-anywhere portability, comfortable over the ear pads, and inline volume control. This headset is best for large head sizes. Also perfect to wear over a stocking hat or baseball cap. 401-2024 **\$49.95**

STARLITE HEADPHONE

Affordable and lightweight. 1/4" 90 degree, nickel-plated stereo plug. 32 OHM, frequency response 20-20kHz. 6-ft. soft, coil cord. Padded, adjustable headband with padded swivel earcups. 401-2020-1 **\$24.95**

INTERNATIONAL WALL CUBE CHARGER

Spectra V3 Charger. (Replaced 509-0037). Use inside the USA and also adapts (plugs change out) for world wide International use. Electronics automatically adapts to all voltage/current. 509-0042 **\$29.95**

Protect your investment...

<<< CLASSIC CARRYALL BAG >>>

Fits all models except TM 808. Does not require disassembly of metal detector. 601-1205-3 **\$49.95**

DELUXE BACKPACK >>>

Fits most White's models. Two 12"x12" zippered accessory pockets. Adjustable shoulder straps, padded back and hanging loops. 601-1254 **\$49.95**

DELUXE APRON

Heavy-duty nylon hunting apron with 2 pockets and full zipper. Adjustable strap up to 50". 601-1253 **\$14.95**

NEW! DIGMASTER >>>

Ultimate trowel. Heat tempered, serrated edge. Sheath included. 601-0073 **\$39.95**

<<< NEW! TARGET DEMO KIT

You can HEAR what common targets sound like... and SEE how they display on the screen. Just throw the targets down and sweep over them to learn the sights and sounds of common targets. Included: Quarter, Dime, Nickel, Penny, Bottle Cap, Pull Tab, Nail. 802-8093 **\$6.95**

NIMH CHARGER STAND

NiMH Charger Stand required for use of 509-0042 or 509-0037 Charger and 802-5281 NiMH Rechargeable Battery. Holds Battery and completes / monitors charger electrical functions. 802-5285 **\$49.95**

STANDARD NIMH RECHARGEABLE BATTERY

Standard Equipment with Spectra V3i, also works well as a premium rechargeable battery for MXT and M6. Must be charged with 509-0042 or 509-0037 and 802-5285 Charger and Charger Stand. Three hours to full charge, longer life per charge compared to NiCad Rechargeable batteries. 802-5281 **\$59.95**

HEAVY DUTY NIMH RECHARGEABLE BATTERY

Heavy Duty Replacement/Substitution for standard 802-5281 NiMH (1800 mAh) Rechargeable Battery and 802-5211-1 NiCad Battery. Must be recharged only with 509-0042 or 509-0037 NiMH Charger and 802-5285 NiMH Charging Stand (V3i Standard equipment charging system). Provides 2200 mAh capacity for a 20% increase in use time prior to recharge over standard 802-5281. Can be used with M6, MXT, XLT, VX3, V3i and Slim Line TDI (SL) models. 802-5321 **\$79.95**

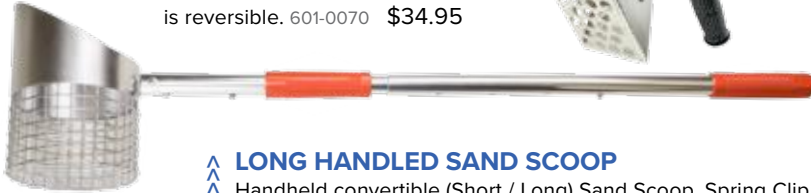

<<< BULLSEYE II PINPOINTER

When you've located a target and dug the hole, use the Bullseye II Pinpointer to precisely "pinpoint" the target. No tuning. Completely automatic. Works in either "vibration" or "beep" mode. Powerful LED light illuminates target areas when the button is pushed. Powered for up to 20 hours on a single 9-Volt battery. 36 kHz operating frequency, doesn't interfere with any other metal detector 812-0002 **\$119.95**

SAND SCOOP >>>

Handheld aluminum sand scoop. Rubberized grip. Heavy duty, hand-built construction. Handle is reversible. 601-0070 **\$34.95**

▲ LONG HANDLED SAND SCOOP

▲ Handheld convertible (Short / Long) Sand Scoop. Spring Clip disassembles for travel/storage. 601-0069 **\$59.95**

<<< DELUXE GOLD PANNING KIT

Everything you need to start panning for gold. 14" Gold Pan, 10 1/2" Finishing Pan, Classifier, Pan for Gold The Basics book, 50 Gold Facts booklet, suction bottle, suction pipette, specimen bottles, stainless tweezers and magnifier.* **items may be substituted if unavailable.* 802-8069-1 **\$49.95**

exclusive MX SPORT ACCESSORIES

9.5 SPORT COIL

This waterproof concentric coil is tuned for MX Sport, with waterproof connector. A great all-around search coil for all types of hunting. 801-3257 **\$149.95**

6X10 SPORT COIL

This waterproof elliptical search coil is tuned for MX Sport, with waterproof connector. Provides improved rejection of extreme ground conditions and target separation in areas with lots of trash. 801-3258 **\$179.95**

SPORT WATERPROOF HEADPHONE

Works with the MX Sport only. Specially designed heavy duty waterproof connector. Hybrid design featuring the noise canceling ear cups featured on the ProStar headphone, with a Piezo-audio waterproof speaker.. 802-5345 **\$149.95**

MX SPORT CAP

Mid-profile, structured design. Black brushed-cotton twill. Trim in gold. Velcro® closure at the back can be adjusted to the best fit. 601-1266 **\$14.95**

SUPER SOFT CHARCOAL HOODED SWEATSHIRT

This hooded sweatshirt is a 50-50 cotton and polyester blend with a super soft feel. Available in sizes: S-3XL Color: Charcoal Grey. 602-1143 **\$29.95**

WOMEN'S CUT SUPER SOFT T-SHIRT

100% preshrunk ringspun cotton 4.5-oz. Classic contoured silhouette with side seams. Sizes S-XXL Color: Dark Heather Grey. 602-1141 **\$14.95**

SUPER SOFT T-SHIRT HEATHER BROWN AND NAVY

This t-shirt is a 50-50 cotton and polyester blend. Features a tag-free neck label for added comfort. Available in sizes: S-3XL. Available in Heather Brown and Navy 602-1142 **\$14.95**

BASEBALL CAP

100% cotton chino twill cap has a soft, smooth feel. Structured, mid-profile, 6-panel construction for a durable feel and crisp, athletic look. The visor is pre-curved and Velcro back strap adjusts to fit most head sizes. Khaki or Navy 601-1260 **\$12.95**

GEARED UP AND READY TO GO

LOWER FIBER ROD

Replacement lower rod section connecting the loop to the upper aluminum rod. When used with older models requires 802-5096-14 Adapter Kit. 500-0242-1 **\$14.95**

PEE WEE LOWER ROD

PeeWee Rod Replacement lower rod makes the Coinmaster and Prizm models usable by even small children. Measuring a total of 18 inches long, it is 5 inches shorter than standard rods. 500-0242-4 **\$9.95**

EXTENSION CENTER ROD

Aluminum center rod section, standard equipment with GMT and BeachHunter models. Can be added to any White's model between the lower fiber rod and upper Aluminum "S" rod. Extends adjustable length 4.5" to 12" inches. 500-0288-1-MB **\$19.95**

MX SPORT PENLIGHT HOLDER

MX Sport Penlight battery Holder. Replacement for standard equipment. Holds "8" "AA" penlite batteries. Fits all MX Sport models. 523-0027 **\$9.95**

3/8" HARDWARE

Replacement nut, bolt and washers for current models. 802-5096-11 **\$1.50**

HIPMOUNT KIT FOR V3i AND VX3

Converts V3i and VX3 models so that the control box can be mounted on a belt (reducing weight). Reducing effort to that of the search coil and hip-mount handle alone during use. LCD and pinpoint toggle remains on the control box. Also compatible with DFX and XLT models. 802-5260 **\$59.95**

HEAVY DUTY ARM CUP

Thicker material than standard. Recommended for heavy sand, brush, or water use. Non-adjustable hole position. Comes with arm cup strap. 802-5257-MB **\$9.95**

Search Coils *maximize your hunting experience*

ECLIPSE 950 COIL

Eclipse 9.5" Search Coil for Spectra Series, MXT All Pro, MX5 and M6. High performance multi-harmonic 9.5 inch search coil. Standard equipment on many MXT/M6. Bridges the gap between large search coils for maximum depth and small search coils for trashy areas. Arguably best all-around general purpose size. 801-3228-1 **\$149.95**

ECLIPSE 6X10 DD COIL

Eclipse DD (6x10) Search Coil for Spectra Series, MXT, MXT All Pro, MX5 and M6. Elliptical "DD" loop provides better rejection of extreme ground conditions. Excellent speed hunting loop with quick and accurate audio discrimination. 801-3241 **\$179.95**

SUPER 12 COIL

Super 12 Search Coil for Spectra Series, MXT, MXT All Pro, MX5 and M6. This new 12" concentric coil is designed for maximum depth and ground coverage in moderate to low mineralized grounds. 801-3235-1 **\$249.95**

ECLIPSE 5.3 COIL

Eclipse 5.3 (6x6) Search Coil for Spectra Series, MXT, MXT All Pro, MX5 and M6. Provides better separation between targets in moderate to high trash areas and excellent pinpointing. Compared to larger search coils - improved sensitivity to physically smaller metal targets provides improved performance in moderate to high trash and a physically smaller foot print for working around obstacles. 801-3240 **\$149.95**

D2 COIL

Fits Spectra Series, MXT, MXT All Pro, MX5 and M6. The new D2 10" DD coil is built for severe grounds - with the best DD pinpointing White's has ever built. Greater ground coverage per pass compared to concentric 10" loops. Minimalist design for the lowest 10" DD weight ever at 17.9 oz. Less sweep resistance. 801-3238-1 **\$249.95**

ECLIPSE 4X6 SHOOTER COIL

Eclipse Shooter "DD" (4x6) Search Coil fits Spectra Series, MXT, MXT All Pro, MX5 and M6. Elliptical 4x6 inch "DD" design provides superior performance in extreme ground, better sensitivity to smaller metal targets, performance in extreme trash and physically smaller foot print for working around obstacles. Longer but narrower detection window compared to similar sized search coils. Finds the good stuff in areas heavily littered with trash. 801-3239 **\$149.95**

MXT MAX COIL

Specifically for use with MXT, MXT All Pro, MX5 and M6. Designed for larger metal items, relics, groups of coins, jar hunting, searching sand bars for large nuggets, etc. Three feet plus (depending upon target size and search mode) on larger masses of metal. Not tuned for VX3 / V3i. 2.25 lbs. Loop Stabilizer 802-5190-1 recommended (*not standard equipment*). Search areas where digging is not critical and a quality "shovel type" digging tool recommended. 801-3245 **\$249.95**

Compatibility of featured coils

| 9" TREASURE/COIN | | | | | ✓ |
| 4X6 TREASURE/COIN | | | | | ✓ |

9" TREASUREMASTER / COINMASTER COIL

Fits all Coinmaster/Prizm models. Open spider design. Epoxy filled, less buoyant, reduced sweep resistance. Heavy Duty cable. Standard equipment with Current Coinmaster. Compatible with Coinmaster/Prizm Spider/TreasureMaster®/TreasurePro. 801-3231-0 **\$149.95**

4X6 TREASUREMASTER / COINMASTER / PRIZM

Provides excellent trash rejection while maintaining good detection depth and performance in extreme grounds. Maintains reasonable display calibration. Works with standard Mini "DD" loop cover #501-4117. Works great with current Coinmaster, Coinmaster Pro, and 6T. Also works great with Prizm II, III, IV, V. 4X6 Prizm DD. 801-3237 **\$149.95**

Are most metal detectors basically the same?

THERE ARE FIVE BASIC TYPES OF METAL DETECTORS:

General Purpose: Coin/Relic/Treasure | Gold Prospecting | Underwater and Salt Beach | Cache Hunting/Deep Searching | Industrial and Security

SOME METAL DETECTORS are designed specifically for one type of searching. For example, gold prospecting detectors are designed to be extremely sensitive to small pieces of gold. General purpose models are typically not designed to detect metals as small as a grain of rice but do offer better trash metal rejection compared to prospecting models.

WHEN PURCHASING A METAL DETECTOR, it is important to consider what type of metal detecting you will do most often and prioritize according to your typical use.

How deep do metal detectors detect?

THIS IS THE MOST FREQUENTLY ASKED QUESTION and unfortunately the most difficult to answer! Most general purpose models are factory equipped to search for coin and jewelry sized metals at depths of up to 12 inches, depending on metal size and alloy. To detect beyond 12 inches requires larger accessory search coils and/or to give up attempts to eliminate trash metals.

DETECTION DEPTH VARIES WITH MANY FACTORS:

- ✓ The size, shape, exact metal alloy and orientation of the object in the ground.
- ✓ The size of the search coil. Soil conditions and the amount of minerals in the soil.
- ✓ The experience and skill of the operator.
- ✓ The metal detector used and the selection of settings, particularly All Metal or Disc.

| DETECTOR | ALL METAL / PINPOINT MODE | NOTCH DISC (ADJUSTABLE) | DETECTING FREQUENCY (IN KHZ) | COLOR DISPLAY | BACKLIT DISPLAY | PRESET PROGRAMS | VDI TARGET ID | BATTERIES (INCLUDED) | RECHARGEABLE BATTERY SYSTEM | TARGET ID | TARGET ICONS |
|-----------------|------------------------------|----------------------------|------------------------------------|---------------|-----------------|-----------------|---------------|----------------------|--------------------------------|-----------|--------------|
| SPECTRA® V3i | ✓ | ✓ | 2.5, 7.5, 22.5 kHz | ✓ | ✓ | 9 | ✓ | ✓ | ✓ | ✓ | ✓ |
| SPECTRA® VX3 | ✓ | ✓ | 2.5, 7.5, 22.5 kHz | ✓ | ✓ | 8 | ✓ | ✓ | OPTIONAL | ✓ | ✓ |
| MXT ALL-PRO | ✓ | | 14 kHz | | ✓ | 3 | ✓ | ✓ | OPTIONAL | ✓ | ✓ |
| MX SPORT | ✓ | ✓ | 14 kHz | | ✓ | 6 | ✓ | ✓ | OPTIONAL | ✓ | ✓ |
| MX5 | ✓ | ✓ | 14 kHz | | ✓ | 2 | ✓ | ✓ | OPTIONAL | ✓ | ✓ |

Metal Detecting - Code of Ethics

Knowing where and how to metal detect responsibly preserves the hobby for treasure hunters now and in the future.

ALWAYS REMEMBER TO:

- ✓ Obtain permission before you detect or dig, even on public lands. Regulations vary by state, so it's always best to double-check first.
- ✓ Leave the area like you've never been there. A properly dug "plug" can quickly be turned back over and tamped down, with little sign a hole was dug.
- ✓ Report any discoveries that may have historical value to a local historian or museum. Not only is preserving history the right thing to do, in many cases it's mandated by law.
